

Calibration

Calibration

Hermon Laboratories offers a comprehensive range of calibration services for electrical and environmental characteristics

- *Antenna factors*
- *Electromagnetic probes*
- *EMC equipment*
- *DC and AC voltage current*
- *Capacitance/Impedance/Resistance*
- *RF power*
- *Time and Frequency*
- *Environmental*

For many types of test and measurement equipment such as antennas, field sensors, spectrum analyzers, counters and oscilloscopes etc.

Hermon Laboratories is accredited by A2LA and ISRAC in accordance with the recognized International Standard ISO/IEC 17025 and meets the requirements of ANSI/NCSL Z540-1 for various types of electrical calibration services.
